## Relevant Experience

### Junior Frontend Developer • *Trellissoft, Goa*

August 2023 – February 2025

- Collaborated with cross-functional teammates to built key LMS modules like Assessments, User Management, and Licensing using Angular 16, always focusing on responsiveness and real-world usability.
- Improved complex, data-heavy screens by adding features like filtering, sorting, pagination, and lazy loading—this helped cut page load times by around 30% - 40% and made it much easier for users to navigate large datasets.
- Designed a dynamic weightage tracking system for assessments, making the scoring process more accurate and reliable.
- Spent time polishing UI components—tweaking layouts, improving accessibility (WCAG 2.1), and adding visual clarity that made the app easier and more enjoyable to use.
- Often jumped in to support teammates working with React and shared UI/UX ideas that helped us make better design choices as a team.
- Took part in code reviews and shared best practices that kept our frontend code clean, modular, and scalable for future updates.

### UI/UX Design Intern • *Fluxatic Global, Goa*

August 2022 – October 2022

- Prototyped wireframes and high-fidelity mockups in Figma for a mental health awareness app.
- Contributed original ideas and layout improvements during brainstorming and review sessions.
- Focused on screen structuring, visual consistency, and aligning design with user needs.
- Assisted in organizing and presenting the project professionally for competition submission

### Web Design Intern • *Brushflicks*

October 2021 – November 2021

- Helped design and set up a basic e-commerce website using WordPress and Hostinger.
- Applied themes and made layout adjustments with guidance.
- Assisted with content placement and visual styling.
- Gained hands-on experience in WordPress setup and design tools.

## Selected Projects

### Portfolio - kalpateli07

Personal website built with **React**, **GSAP**, and **Framer Motion**

Showcases frontend and UI/UX skills through interactive design. Features include a paper-plane navigation animation, glowing cursor effects, and animated project popups. Emphasizes storytelling with micro-interactions and a clean layout.

### Nexvent - Event Discovery Platform

Landing page built with **React**, **Tailwind CSS** and **Figma**

Designed for suggesting online and offline events globally (excluding personal events). Focused on intuitive UI/UX, interest-based recommendations, and planned support for location-aware filtering.

### Remote Delivery App

**MERN** stack final year project

Contributed frontend development for features such as KYC form handling, distance-based cost logic, and route visualization using interactive maps. Contributed to user and order flow functionality.

### Real-Time Chat App

Built by following a **MERN** + **Socket.io** tutorial

Gained practical experience with real-time messaging concepts including user authentication, private chat rooms, typing indicators, and WebSocket integration.

## Skills

### Libraries & Frameworks

React, Angular, Node.js, Express, Socket.io, Tailwind CSS, Framer Motion, GSAP, Bootstrap

### Programming Languages

JavaScript, TypeScript, HTML, CSS, C++, Java, SQL

### Tools/Platforms

Git, GitHub, Vercel, Figma, Netlify, Postman, WordPress, MongoDB

## Education

### BE Computer Engineering

CGPA : 8.96/10

Agnel Institute of Technology and Design  
~ 2019-2023

## Certificates

### The joy of computing using Python

• Completed NPTEL course with 82%

### Complete Full Stack Website

Developer Course

• Udemy (March 2025)

## Interests

- UI/UX design,
- Animation,
- Graphic design,
- Puzzle Solving,
