Overview

Creative and growth-driven Frontend Developer with a strong background in React, Angular, TypeScript, and UI/UX design. Experienced in building scalable, performant interfaces and collaborating across functions to deliver production-ready features. Passionate about building meaningful user experiences and exploring tech like Next.js.

Skills

Languages & Frameworks: React.js, Angular, Next.js, TypeScript, JavaScript, Redux, Zustand, Node.js, Express, C++

Styling: Tailwind CSS, CSS3, HTML5, GSAP, Framer

Design: Figma, Canva, UI/UX Principles, Prototyping

Tools: Git, Vercel, Netlify, WordPress, Hostinger

Databases: MongoDB, PostgreSQL (basics)

Others: REST APIs, Socket.io

Work Experience

Independent Projects & Portfolio Development

Feb 2025 – Present

- Built multiple projects including a full-stack e-commerce app, real-time chat application, and responsive landing pages.
- Created a personal portfolio and explored freelancing through UI, Figma, and graphic design projects.

Junior Frontend Developer

Trellissoft Engineering • Full-time • Aug 2023 – Feb 2025

- Led the development of a Learning Management System (LMS) focusing on Assessment, Multitenancy, User, Courses & Classes modules using Angular.
- Engineered reusable components and implemented features like infinite scrolling, filtering, sorting, pagination, and skeleton loaders, boosting data load performance by ~30%.
- Delivered key features: multitenancy support, dynamic filters & sorters, assessment weightage logic, full CRUD for Assessments, and responsive tables with pagination.
- Collaborated with backend, QA, and UI/UX teams to ensure smooth end-to-end delivery of modules and features.
- Participated in code reviews, debugged and optimized complex UI flows, and contributed to scalable design patterns and component reuse.
- Completed in-house training on React, Angular, and UI/UX; mentored teammates and assisted with module development and debugging.
- Demonstrated leadership, teamwork, and a strong support ethic by actively helping coworkers and driving shared success.

UI/UX Intern

Fluxatic Globals • Internship • Aug 2022 - Oct 2022

- Utilized Figma to prototype and design user interfaces based on modern UI/UX principles.
- Explored React fundamentals while co-developing wireframes and prototypes for a mental health app that won a design competition.
- Contributed creative ideas and took ownership of tasks during collaborative team sessions.
- Project link: [Mental Health Project](#) (Figma)

Web Designer Intern

Brushflicks • Oct 2021 – Nov 2021

- Designed and deployed a responsive e-commerce website using WordPress and Hostinger.
- Focused on mobile-first design, optimized for SEO, and streamlined user navigation across product categories.
- Gained experience in hosting, deployment, and practiced client-focused design strategies.

Selected Projects

- **Kartana:** full-stack e-commerce platform built with Next.js, TailwindCSS, GraphQL, Node.js, MongoDB, featuring product browsing, cart management and checkout
- **Real Estate Landing page:** Designed and developed a responsive real estate landing page for Terranesst with React, Tailwind CSS, and GSAP, focused on visuals and lead generation.
- **HRMS :** Angular-based HR system with modules for attendance, roles, and user management. Built during tenure at Trellissoft.
- **Portfolio Website:** Animated and interactive personal site using React, GSAP, Tailwind CSS, and custom UI interactions.
- **Chat App:** Real-time messaging platform using React, Zustand, and Socket.io with login and room-based chat features.

Education

Bachelor of Engineering (B.Eng) – Agnel Institute of Technology and Design
Computer Science • 2019 - 2023 • CGPA : 8.96 / 10
